

For Banking

TURN IN-PERSON SERVICE INTO YOUR STRATEGIC GROWTH ASSET

Bridge digital convenience and physical expertise to drive revenue, efficiency, and trust

Your customers live in an omnichannel world. They expect the same speed and level of personalization in your branches as they receive through your mobile app. Too often, however, the in-branch experience falls short—characterized by confusion, anonymity, and wasted time. Disconnected journeys and low-quality interactions ultimately erode customer value.

It does not have to be this way. **Linistry** serves as the intelligent digital bridge across your channels. We unify mobile, web, call center, and branch interactions into a single, seamless journey, ensuring that when customers arrive, your teams are prepared. This turns the branch from an operational burden into a data-driven engine for growth.

One Platform. One Journey. Across Every Channel.

Empower the Advisor

Drive Revenue & Growth

Increase sales and advisor impact. **Linistry Appointment Booking** qualifies customers online and intelligently routes them to the most suitable advisor for complex needs such as mortgages or investments, while directing simple transactions to self-service channels.

THE VALUE

Advisors receive pre-qualified visits with full context. They prepare for solutions, not just greetings.

THE RESULT

Structured, well-prepared appointments lead to higher-value consultations and increased revenue.

Elevate CX

A Frictionless, Omnichannel Journey

Build trust through consistency. Linistry connects your digital touchpoints to your physical locations. Whether a customer starts their journey via chatbot, mobile app, or call center, we ensure they land softly in the branch.

THE VALUE

No more "starting over" when they walk through the door. Their context travels with them.

THE RESULT

A truly integrated journey, where customers move seamlessly from digital inquiry to in-branch, face-to-face resolution.

Silence the Noise

Operational Efficiency & Control

A chaotic bank branch erodes confidence and drains resources. **Linistry Queue Management** steers walk-in traffic with intelligent routing and virtual queuing, removing friction and stress from the lobby.

THE VALUE

Optimized staffing and greater control during peak periods. If customers need to wait, they do so on their own terms—not in a physical line.

THE RESULT

A calm, efficient branch environment with shorter waiting times and streamlined operations.

Why Financial Leaders Choose Linistry

We help financial organizations turn in-person service into a strategic advantage.

- ✓ **Enterprise-Grade Security:** ISO 27001-certified and designed for high-trust, regulated environments.
- ✓ **Seamless Integration:** A fully white-label solution that reflects your brand and integrates via APIs into your existing ecosystem.
- ✓ **Fast Time-to-Value:** A rapidly deployable, out-of-the-box platform that gets you live without lengthy implementation cycles.

See the Experience Your Customers and Employees Will Love

Maximize every interaction. Eliminate channel silos and broken journeys. Disconnects are costly - don't let them happen.
