

For Retail

DON'T LET YOUR REVENUE WALK OUT THE DOOR

Turn your physical stores from waiting rooms into high-performing sales engines

Physical stores remain your most powerful conversion channel, yet friction continues to limit their potential. Customers leave when they feel lost or forced to wait. Staff become overwhelmed. Sales opportunities are missed.

It doesn't have to be this way. **Linistry** provides the digital layer that creates a calmer, more controlled shop floor—where customers feel guided and teams feel empowered. By bridging digital and physical channels, we replace friction with flow and turn customer interactions into measurable revenue.

Three Powerful Tools – One Seamless Experience

Guarantee the Sale

The Power of Appointments

Stop relying on footfall and start predicting sales.

Linistry Appointment Booking enables high-intent customers to book consultations or Click & Collect slots in advance, eliminating uncertainty around arrivals.

THE VALUE

Your teams are prepared in advance, knowing who the customer is and what they need before the conversation even begins.

THE RESULT

Customers with **appointments deliver 60%+ higher conversion rates**, turning planned visits into guaranteed revenue opportunities.

Capture the Walk-In

"X-Ray Vision" for Your Staff

Walk-in customers often remain invisible until they make a purchase—or leave in frustration.

Linistry Floor Management App connects footfall with staff availability in real time, eliminating blind spots in in-store service.

THE VALUE

Instantly guide visitors to the best available expert rather than letting them wander aimlessly.

THE RESULT

Orchestrated **shop floor delivers 2-3% higher in-store conversion rates** and significantly fewer missed sales opportunities.

Eliminate the Struggle

The End of the Physical Line

A physical queue is the ultimate friction point. **Linistry Queue Management** structures the demand and allows customers to join via mobile or kiosk, freeing them to browse the store while the system manages the logistics.

THE VALUE

"Stressful downtime" becomes productive shopping time, creating a calm and transparent service experience where customers never feel trapped.

THE RESULT

Lower perceived waiting stress and a significant **improvement in customer satisfaction**.
